

## 52 WAYS TO CARE FOR CREATION FEBRUARY BULLETIN INSERT

### WEEK 6: WAIT UNTIL THE LAUNDRY BASKET IS FULL TO WASH

Only do laundry when the load is full. Not only does this save water and electricity but it also will save you money and time. You can either wait until you have more items to wash, or combine your partial load with your family or housemates.

### WEEK 7: AIR DRY YOUR LAUNDRY

Part two of conserving energy with laundry is to air dry your clothes. You can avoid using extra energy to dry your laundry by hanging a laundry line or using a drying rack. This cuts down on your electricity bill as well!

### WEEK 8: CHANGE YOUR LIGHTBULB TO ECO-FRIENDLY TYPES

CFL and LED bulbs can emit 25-80% less energy than traditional incandescents, plus they last longer! Consider this greener alternative when it comes time to replenishing those bulbs.

### WEEK 9: TRACK YOUR WASTE FOR A WEEK

Keep track of the waste that you create for a week. How much of it can be replaced with recyclables or reusables. What can you challenge yourself to live without? Can you use less plastic by buying food items without packaging or that have paper instead?

Share with us on social media your #CareForCreation tips and tricks and how you've used our January list!
