

52 WAYS TO CARE FOR CREATION APRIL BULLETIN INSERT

WEEK 14: OBSERVE EARTH HOUR ON MARCH 30TH

Turn off the lights for one hour to observe how much energy will be saved if people around the world cooperate with energy saving. Share with your communities how you plan to reduce the amount of energy you use this month.

WEEK 15: START A NEIGHBORHOOD GARDEN

Start a garden in your own backyard or share the work with your community by creating a neighborhood garden. Do you have space in your church's yard, at a vacant lot, or in a nearby park? Gardening is good for creation and saves you money. If you do not have space outdoors you can grow veggies or herbs in pots in your place of residence.

WEEK 16: EAT A PLANT BASED MEAL OR MEALS WITH INGREDIENTS FROM LOCAL FARMS

Check out some tasty and healthy options that do not include meat! Also reduce your footprint by using ingredients from local farms. If it is local, it did not have to travel long distances and use as much energy to get to you.

WEEK 17: OBSERVE EARTH DAY ON APRIL 22ND

Make use of the Earth Day resource developed annually by Creation Justice Ministries. This year's theme is "The Next Generation Rises" and is all about youth involvement with the environment. Our 2019 resource will be available soon, and past years can be found here. While Earth Day is on April 22nd, we encourage you to celebrate when it makes sense for your community due to the proximity to Easter this year.

WEEK 18: EXPLORE LOCAL ENVIRONMENTAL INITIATIVES YOU CAN GET INVOLVED IN

Take some time today to find out what environmental initiatives are going on around you. See if you can participate in projects, events, or committees in your city or town.

Share with us on social media your #CareForCreation tips and tricks and how you've used our April list!
