

# 52 Ways to Care for Creation

June Edition

## Week 21

### Fend Off "Energy Vampires."

*Make sure to turn off and unplug items when they're not in use. The socket draws electricity even when items are "turned off." Some items that are often plugged-in when not in use are blow-dryers, phone chargers, electric kettles, and coffee pots. Other items that are often left in the "on" position when not in use are televisions, computers, and video game consuls.*

## Week 22

### Honor World Oceans Day Tuesday, June 8, 2021

*Plan to honor World Oceans Day with your faith community. Check out [www.worldoceansday.org](http://www.worldoceansday.org) for ideas, and find faith-based resources at [www.creationjustice.org/oceans](http://www.creationjustice.org/oceans)*

## Week 23

### Bring a Reusable Container for Leftovers to the Restaurant

*Next time you go out to eat, bring a reusable container for your leftovers. One-time use plastic and styrofoam containers are easily replaceable with a reusable container. You can leave one by the door, in your backpack, or in your car so that you always remember it.*

## Week 24

### Research How Your Community Regulates Waste

*Each city or town has their own trash, recycling, and compost system. What is the system where you live? Regulations change frequently so take some time today to update yourself. What can you recycle? Does your town have a curbside composting program? Can you compost in your backyard?*

**Celebrate Ocean Month with us by checking out our newly revamped resource**

**Save Our Sacred Seas!**
